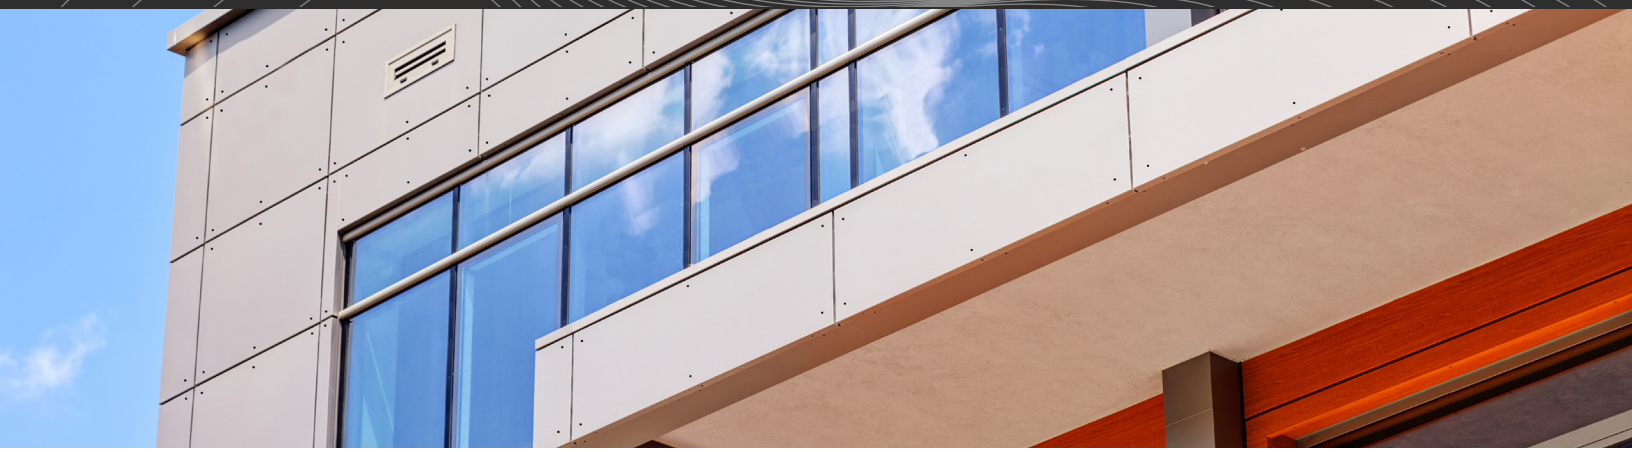
Chrometallics™ Siding

2020 PRODUCT INNOVATION



Groundbreaking metallic coating for your next award-winning design.
We've developed an unparalelled coating technology that gives fiber cement and engineered wood a metallic appearance. A cost-effective and easy to install alternative to metal and aluminum siding products.

Why Chrometallics™?

1 **INSTALLATION**

Chrometallics™ creates a metallic look fiber cement and engineered wood. This means no special trades required onsite for installation.

2 **HANDLING**

Dented aluminum panels are difficult to repair and make onsite handling difficult. Our touch up solution provides a seamless option for repairs.

3 **COST IMPACT**

Upfront material costs combined with lower labor and installation costs make Chrometallics™ siding products a great alternative to metal siding.

QUICK FACTS

- Matching caulking and trim available
- 15 year coating warranty plus substrate warranty
- Enhanced packaging for added protection
- Touch up kits available online
- Samples available through Territory Manager
